PROMISING MAY 2016 CONSTRUCTION PRODUCTS ANNOUNCEMENTS

It's time for the May 2016 construction products announcements, and there's something here for everyone. Rugged phones with new mobile tech, construction management opportunities, resources for construction students, wireless sound system solution that could become a new product line for many contractors, heavy equipment telematics, invisibility glass, much simpler solar energy installations, drone products, ruggedization for your Surface tablet, and a new alliance that makes it easier to go from digital to print, are all lined up here for your review.

Solar Just Got Simpler

The POWERSTATION 247 is a complete and fully integrated, "plug and play" scalable solar energy usage and storage system with built-in battery storage. The system, which can be installed on and off grid comes in three sizes, 5 kW, 10 kW or 15 kW; all have the same battery storage capacity of 17,28 kWh. The free standing cabinet is easy to install and easy to use. The system integrates up to 3 hybrid inverters, solar MPP-trackers, charge controller and lithium-iron batteries, all necessary field wiring terminals and disconnect switches. No more piecemeal systems from different manufacturers. There's lots of detail at the following link <http://www.concept-us.com/powerstation-247/how-it-works/how-it-works.html>.
